> 20 MB free hard disk space
Graphics 800 * 600 or more, > 256 colours

Server

Win NT, Win 2k, Novell, Citrix
> 30 MB free hard disk space (100 MB recommended)
LAN 10-100 Mbit

Technique, language etc.

Programming language: VB 6,0
Internet: Html code and Java script
Intranet: Html code and Java script
Database: Access

Installation alternatives

A Client PC with edit rights needs a full installation.

A Client PC with viewer rights only needs no installation but a web-browser like IE or similar.

Important

Linked documents are saved at their original place, not in the database. The database is only used in design mode. When exported to html code only html and Java script are used in combination with links.

Installation

The installation is performed in two steps, first to the server and then from the server to the clients where edit rights shall be available.

AutoFlowChart uses the UNC-path.

Licensing

Free number of users at the same site.

Compatibility

DOT and XLT files according to MS Office standards. Links can be created to a specific Word page or to a specific work sheet in Excel. Any file type, web address or software can be connected.
